Professional Summary

Results-driven QA Engineer with 3.5 years of experience across insurance, retail, and telecom domains. Proficient in functional, automation, and API testing, with a strong focus on delivering **scalable, reliable, and high-quality software solutions**.

Skills & Expertise

Automation: Selenium, Playwright, Testim
API Testing: Postman, REST Assured, Swagger

Performance: JMeter

Languages: Java, JavaScript, SQL

Frameworks: TestNG, JUnit, Cucumber

DevOps/CI: Jenkins, GitHub, Azure DevOps

Project Tools: JIRA, Splunk, App Insights, Agile

Education

B.E. in Electrical & Electronics Engineering
Andhra University | First Class

Professional Experience

Infosys – Remote | QA Engineer (Contract-to-Hire) | Jul 2024 – Present

Project: Policy Connect – US Insurance Platform

- Automated UI tests using Playwright; reduced manual effort by 65%
- Performed smoke, functional, and regression testing across environments
- Validated APIs via Postman and conducted JMeter performance testing
- Collaborated in Agile sprints to define acceptance criteria
- Used JIRA and Azure DevOps for tracking and reporting
- **Technologies Used:** Playwright, JavaScript, Postman, JMeter, Jenkins, JIRA, Agile

HCL Technologies – Vijayawada | Test Engineer | Feb 2022 – Jun 2024

Project: Coles for Business – Australian Retail

- Contributed to major enhancements in UI and API automation frameworks, improving execution stability, scalability, and test coverage.
- Integrated automation with Azure DevOps pipelines for faster deployments.
- Cut manual regression testing by 60% with reusable test scripts.
- Supported production releases and conducted post-deployment validations.
- **Technologies Used:** Selenium WebDriver, Java, REST Assured, TestNG, Maven, Postman, Jenkins, Azure DevOps, JIRA

Project: Verizon – Global Telecom Provider

- Automated 50+ UI cases improving coverage and execution speed
- Enhanced efficiency by 40% via test script optimization
- Joined client calls to discuss testing scope and acceptance
- Managed daily CI/CD test runs and issue triaging
- **Technologies Used:** Selenium, Java, TestNG, Git, Jenkins, JIRA, CI/CD
